Annex to the letter dated 3 August 2000 from the representatives of China and the Russian Federation to the United Nations addressed to the Secretary-General

Beijing Declaration issued by the Russian Federation and the People's Republic of China

At the invitation of the President of the People's Republic of China, Mr. Jiang Zemin, the President of the Russian Federation, Mr. Vladimir V. Putin, made an official visit to the People's Republic of China from 17 to 19 July 2000. Official talks between the heads of State of the Russian Federation and China were held in Beijing.

During his visit, Mr. Putin held meetings with the Chairman of the Standing Committee of the National People's Congress, Mr. Li Peng, the Prime Minister of the State Council of the People's Republic of China, Mr. Zhu Rongji, and the Chairman of the National Committee of the Chinese People's Political Consultative Conference, Mr. Li Ruihuan.

The heads of the two States, having thoroughly considered the development of ties between the Russian Federation and China over the past decade, noted with satisfaction that the establishment of relations based on equal and confidential partnership and geared towards strategic interaction in the twenty-first century was fully in keeping with the basic interests of the peoples of the two countries. They stressed that the development of relations based on equal and confidential partnership and strategic interaction was of great importance for the strengthening of all-round cooperation between the Russian Federation and the People's Republic of China, and the consolidation of the friendship between the peoples of the Russian Federation and China, and promoted the formation of a multipolar world and a new, just and rational international order.

The heads of the two States believe that, at the beginning of the twenty-first century, there are even greater prospects for the development of Russian-Chinese relations. The Russian Federation and the People's Republic of China intend, on the basis of strategic interaction, to deepen their good-neighbourly relations and friendship, broaden mutually advantageous cooperation and work towards the development and prosperity of the two countries. The two States shall strengthen their interaction in international affairs and promote peace and stability throughout the world.

In the light of the foregoing, the heads of State of the Russian Federation and China declare the following:

I

All joint political instruments that have been signed and adopted by the Russian Federation and China shall serve as a firm foundation for the favourable development of bilateral relations. Committed to the spirit and principles of those instruments, the Russian Federation and China are determined to work tirelessly to raise their mutual relations to a new level.

II

The Russian Federation and China shall continue to encourage ongoing and close contacts between senior leaders of the two countries through various channels and to exchange views on the most important issues concerning their bilateral relations and the international situation. The internal affairs, defence, law-enforcement, economic and scientific and technological agencies of the two countries shall support regular and close contacts, strengthen coordination and enhance cooperation. This shall contribute to the further deepening of mutual understanding and confidence between the two countries and the strengthening of all-round Russian-Chinese strategic interaction.

III

In the international arena, the Russian Federation and China shall support the forces of peace, stability, development and cooperation and oppose hegemony, policies based on the use of force or blocs, attempts to revise the fundamental norms of international law, and efforts to exert pressure through the use of force or interference in the internal affairs of sovereign States.

As permanent members of the Security Council of the United Nations, the Russian Federation and China shall undertake joint action to support the leading role of the United Nations and the Security Council in international affairs, particularly in the maintenance of peace and security, thereby contributing to the development of multipolarity in the world.

The heads of the two States expressed their satisfaction at the results of the meeting of the leaders of the countries of the Shanghai Five in Dushanbe on 5 July 2000, a meeting in which the President of the Republic of Uzbekistan took part, and believe that cooperation among the five States is entering a new phase. The Russian Federation and China are prepared to contribute in every way possible to the strengthening of interaction within the Shanghai Five.

There is mutual understanding between the Russian Federation and China on the question of guaranteeing security and stability in the regions contiguous with their territories.

IV

The purpose of the joint statement on anti-missile defence issued by the President of the Russian Federation and the President of the People's Republic of China, which was signed at this summit meeting, is to strengthen global and regional strategic stability, preserve the existing system of treaties in the field of arms control and disarmament, promote the non-proliferation of weapons of mass destruction and the means of their delivery and safeguard the security interests of all States without exception.

An analysis of the current international situation demonstrates the complete untenability of the use by some States of the so-called "missile threat" as grounds for their demands for the amendment of the Anti-Ballistic Missile Treaty.

V

The Russian Federation and China, proceeding from respect for each other's independence, sovereignty and territorial integrity, resolutely oppose any schemes or actions by internal or external forces aimed at dividing the State, and express their understanding and support for each other's efforts to defend the unity, sovereignty and territorial integrity of the State.

National separatism, international terrorism, religious extremism and transboundary crime pose a serious threat to the security of sovereign States and to world peace and stability. The Russian Federation and China are resolved to take active and effective concrete measures at the bilateral and multilateral levels to combat the aforementioned phenomena.

VI

The Russian Federation confirms its consistent position of principle on the question of Taiwan, namely, that the Government of the People's Republic of China is the sole legal Government of China and that Taiwan is an inalienable part of Chinese territory. The Russian Federation does not support the concept of "Taiwanese independence" in any form and supports the rejection by the People's Republic of China of the concept of "two Chinas" or "one China, one Taiwan". The Russian Federation opposes the admission of Taiwan to membership of the United Nations and other international organizations whose members are only sovereign States. The Russian Federation has no intention of delivering arms to Taiwan.

The People's Republic of China expressed its sincere gratitude to the Russian Federation for its position on the question of Taiwan and its consistent support for the "one China" principle.

The Russian Federation and China consider inadmissible the interference of external forces in the settlement of the question of Taiwan, which is an exclusively internal affair of China, and stress that such attempts can only lead to an escalation of tension in the Asia and Pacific region.

VII

The further all-round and comprehensive development of cooperation between the Russian Federation and China in the fields of trade and economy, science and technology and military technology is one of the principal areas for broadening and deepening Russian-Chinese relations based on an equal and confidential partnership and strategic interaction.

The heads of the two States expressed their satisfaction with the operation of the mechanism of regular meetings of the heads of Government of the Russian Federation and China and believe that that mechanism plays an important role in promoting cooperation in the areas of trade and economy, science and technology, defence, energy (including petroleum and gas), transport, the nuclear industry, aviation and space, and banking.

The Russian Federation and China shall make efforts to increase bilateral cooperation in specific areas with a view to further strengthening the material basis

for strategic interaction between the two countries. The Russian Federation and China shall consider opportunities for Russian participation in the development of the western regions of the People's Republic of China, including the exploitation of petroleum and gas deposits and the construction of gas pipelines.

They emphasized the need to strengthen and broaden bilateral cooperation in the fields of science and technology, education, culture and sport.

VIII

The successful implementation of the Agreement between the Government of the Russian Federation and the Government of the People's Republic of China on the joint economic exploitation of individual islands and the adjacent waters of border rivers of 9 December 1999, which has no historical precedent, is yet another important step towards transforming the Russian-Chinese border into a zone of good-neighbourliness and friendship.

The Russian Federation and China intend to continue, in a constructive and businesslike spirit, negotiations with a view to speeding up the formulation of options for resolving the question of disputed segments of the border between the two States. Until such time, the status quo in the disputed segments of the border between the two States shall be maintained.

IX

The Russian Federation and China expressed their satisfaction in connection with the beginning of the practical implementation of agreements between the Russian Federation, China, Kazakhstan, Kyrgyzstan and Tajikistan on confidence-building in the military field and mutual reduction of armed forces in the border area. The scrupulous fulfilment of the provisions of those agreements shall promote peace, tranquillity, stability and prosperity in the border area and the development of good-neighbourly relations among all States parties to the agreements. They acknowledged the advisability of considering further opportunities for building confidence in the military field.

X

The friendship between the peoples of the two countries, which has been handed down from generation to generation, is in keeping with the common aspirations of the peoples of the Russian Federation and China. The consolidation of that friendship requires the broad participation and tireless efforts of both the organs of authority and the peoples of the two countries. To this end, they shall vigorously support the activities of the Russian-Chinese Committee on Friendship, Peace and Development and shall encourage various kinds of social contacts.

XI

In order to consolidate long-term and stable relations between the two States on the basis of good-neighbourliness and friendship, mutual trust and mutual advantage, the heads of the two States agreed to begin negotiations on the drafting of a Russian-Chinese treaty on good-neighbourliness, friendship and cooperation.

XII

The President of the Russian Federation, Mr. Vladimir V. Putin, invited the President of the People's Republic of China, Mr. Jiang Zemin, to make an official visit to the Russian Federation at a suitable time in 2001. The invitation was accepted with gratitude. The dates of the visit shall be established through the diplomatic channel.
